

E370 Eco Integral Backstay Adjuster

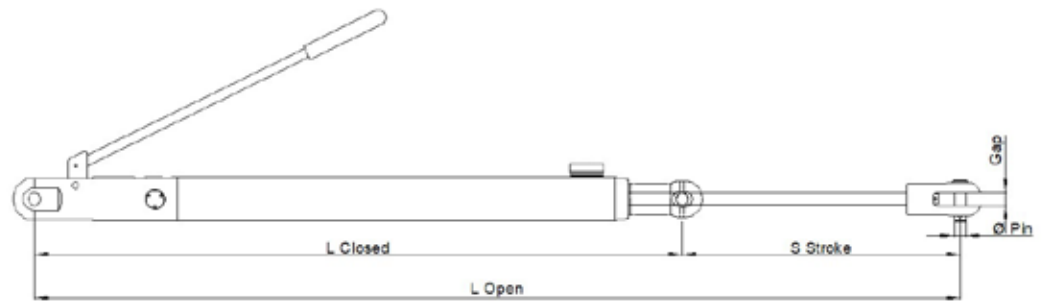

To respect the environment, mineral oil has been replaced by the latest generation of **biodegradable fluid** across the entire RSH adjusters line.

The RSH Integral adjuster bodies and fittings are made of black hard-coated aluminum and AISI 316 steel for the rod.

Easy to operate, featuring a prominent positioned pressure gauge, enabling fast and accurate reading of tension values.

The standard range is optimized for work with the last generation of yacht layout.

Technical Data
