

E290 Composite tank Modular

Ventilated reservoir in light and sturdy composite material, here are the main features that distinguish it:

- **Translucent surface:** Allows immediate control of the level of the fluid contained inside
- **Fixing brackets:** Supplied in the kit, they have various mounting options allowing an easy installation on board.
- **Modularity:** Reservoirs with custom dimensions and fittings can easily be supplied.

It could be upgraded into a **pressurized reservoir** using the special kit complete with pressure gauge, filling valve and relief.

Technical Data

Ref.	Description	Nominal capacity Lt	A (mm)	H mm (in)
E290-01-05	5 Lt Composite reservoir, ventilated	5	214	274
E290-01-10	10 Lt Composite reservoir, ventilated	10	214	422
E290-01-XX	Custom composite reservoir, ventilated	Custom	214	Custom
E290-01-A	Pressurized reservoir conversion kit
